

PGY2 Emergency Medicine Pharmacy Residency Structure

The PGY2 emergency medicine pharmacy residency at Intermountain Medical Center is comprised of six to seven months of emergency medicine rotations and several elective rotations.

During these rotations, the resident will be involved in all aspects of patient care including: 1) committee involvement, 2) collaborative, multidisciplinary development of protocols and standard operating procedures, 3) providing education to patients, nurses, physicians and other health care providers, and 4) completion of a research project. Rotations are 4 weeks each unless otherwise indicated.

Required Rotations
